PYTHAGORAS
ENGINEERING CONSULTANCY & SERVICES

WEBINAR 1 OF 2 · LIVE ONLINE

PREVIEW THE 5-DAY WORKSHOP · ANSYS + PY-FFS

Design by Analysis & Fitness-for-Service

ASME VIII-2 Part 5 and API 579-1/ASME FFS-1 Part 9 (crack-like flaws), Levels 1, 2 and 3, for pressure vessels, tanks, piping and oil & gas equipment

DATE
Sun, 29 Nov 2026

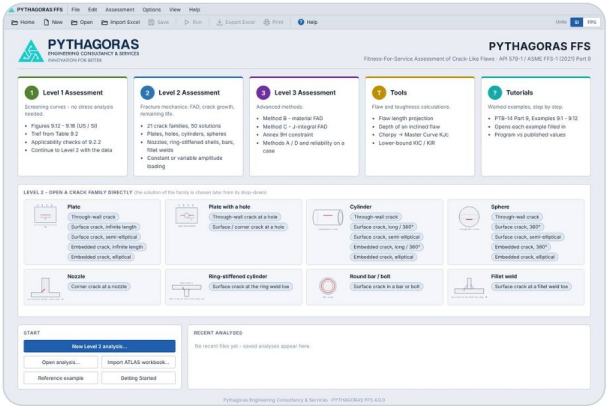

TIME
7:30 – 9:00 PM IST

IN THIS WEBINAR, BRIEFLY

The course
Who it is for and how the 5 days run

What you will learn
From design by analysis to crack assessment

Fees and Q&A
Classroom and online options, open questions

WORKSHOP ROADMAP · 9–13 DECEMBER 2026

DAY 1 · WED 9 DEC	**FEA for pressure equipment with ANSYS** Meshing, nonlinear and thermal analysis, nozzles · Lab 1
DAY 2 · THU 10 DEC	**ASME VIII-2 Part 5: collapse and local failure** Stress categories, linearisation, limit-load · Lab 2
DAY 3 · FRI 11 DEC	**Part 5: buckling, fatigue and ratcheting** Welded joints, shakedown, thermal stress · Lab 3
DAY 4 · SAT 12 DEC	**API 579-1 Part 9: Levels 1 and 2** Flaw characterisation, FAD for every crack case · Lab 4 in PY-FFS
DAY 5 · SUN 13 DEC	**Level 3, crack growth and remaining life** J-integral, Paris law, inspection intervals · group project, test, certificate

Classroom, Bengaluru
US$1,550 + taxes · 20 seats

Live online
US$1,150 + taxes · recordings for 30 days

35 hours · 10 hours of labs
6 months of online course access
